👤 Summary

Front-End Engineer specializing in React, TypeScript, and modern web applications. Experienced in translating product requirements and Figma designs into scalable, production-ready user interfaces. Strong focus on component architecture, maintainable code, responsive design, and collaborative software development workflows. Comfortable working in shared codebases, shipping features, and delivering business-focused solutions with minimal supervision.

🧰 Professional Experience

Front-End Engineer, Qred 01/2026 – Present | Lagos, Nigeria

- Developed production-ready marketplace features in a live **React + TypeScript** codebase.
- Redesigned and implemented the Featured Accessories section based on **Figma** specifications while maintaining consistency with the existing design system.
- Built category, brand, and price filtering functionality, improving product discovery and marketplace usability.
- Collaborated with product stakeholders and engineers to clarify requirements, refine implementation details, and deliver features aligned with business goals.
- Worked within a shared **Git workflow**, creating feature branches, opening pull requests, addressing feedback, and maintaining code quality standards.
- Improved **mobile user experience** by identifying usability issues and proposing responsive solutions for marketplace filtering.
- Maintained reusable, readable, and scalable **React components** using **TypeScript and Tailwind CSS**.

Software Engineer (Apprentice), 2025 | Remote
ALX ProDev Front-End Program

- Developed and optimized production-style web applications using **React, TypeScript and Dynamic routing Architectures**.
- Managed version control and continuous deployment pipelines using **Git, Github, and Vercel**, maintaining clean commit histories and agile sprint velocities.
- Conducted code reviews focused on component maintainability, structural clarity and long-term codebase scalability.

🎓 Education

B.sc, Information and Communication Technology, 2025 | Kano, Nigeria
Northwest University, Kano.

Skills

Frontend

React, Next.js, TypeScript, JavaScript, HTML5, CSS3

Collaboration

Git, GitHub, Pull Requests, Code Reviews, Agile Team Workflow

UI Development

Tailwind CSS, Responsive Design, Accessibility

Deployment

Vercel

Software Engineering

Component Architecture, State Management, API Integration, Performance Optimization

Certificates

- ALX ProDev Frontend - 2025
- ALX Professional Foundations - 2025
- Apstech HTML5 with Responsive Web Design - 2022

Projects

Qred - A Roadside Emergency Response, Front-End Engineer

Roadside assistance and vehicle services platform connecting vehicle owners with verified service providers.

- Developed marketplace functionality for automotive products and accessories using React and TypeScript.
- Implemented dynamic filtering for categories, brands, and price ranges to improve product search experience.
- Translated Figma designs into responsive user interfaces while maintaining accessibility and component consistency.
- Collaborated with designers and engineering team members in an active development environment using Git and GitHub workflows.
- Contributed to feature development, UI improvements, code reviews, testing, and pull request processes.

Tech: React, TypeScript, Tailwind CSS, Git, GitHub

Movie Recommendation App, Front-End Developer

10/2025

Production-Scale Movie Discovery Platform

- Developed a highly responsive movie discovery engine using **Next.js** dynamic routing (/movie/[id]) and advanced asynchronous data fetching.
- Integrated the **TMDb API**, architecting robust error boundaries, skeletons, and loading states to maximize user retention.
- Engineered a localized personalization engine using browser storage pipelines to cache client-side user preferences seamlessly.
