PROFESSIONAL SUMMARY

Front-End Engineer with hands-on production experience in React, Next.js, and TypeScript. Proven ability to translate Figma designs into accessible, responsive, and performant user interfaces. Experienced in REST API integration, component architecture, state management, and collaborative Git workflows. Sole designer and engineer of Mastery Engine — a full-stack AI SaaS with real users — built with Next.js 14, Supabase, Groq LLM integration, and deployed on Vercel. Seeking a remote junior or mid-level Front-End role.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3

Frameworks & Libraries: React, Next.js 14 (App Router), React Hooks, Context API

Styling: Tailwind CSS, Responsive Design, Mobile-First, Accessibility (WCAG)

Backend & Auth: Supabase (Auth, PostgreSQL, RLS), REST APIs, Server Components, SSR

AI Integration: Groq API, LLM prompt engineering, streaming AI responses, JSON generation

Tooling & DevOps: Git, GitHub, Vercel, npm, ESLint, TypeScript compiler, CI/CD

Design: Figma (design-to-code), component systems, design tokens

Practices: Agile, code reviews, pull requests, performance optimisation, SEO

PROFESSIONAL EXPERIENCE

Front-End Engineer — Qred

01/2026 – Present | Lagos, Nigeria

- Built and shipped production-ready marketplace features in a live React + TypeScript codebase, improving product discovery and conversion for end users.
- Redesigned the Featured Accessories section from Figma specifications, maintaining full consistency with the existing component library and design system.
- Engineered category, brand, and price filtering using React state management and REST API integration, reducing user search friction across the marketplace.
- Improved mobile user experience by identifying usability issues and implementing responsive CSS and touch-optimised interactions.
- Maintained reusable, scalable React components with TypeScript and Tailwind CSS, upholding code quality standards across the shared codebase.
- Collaborated through Git workflows — feature branches, pull requests, code reviews — delivering features on sprint deadlines.

Software Engineer (Apprentice) — ALX ProDev Front-End Program

2025 | Remote

- Developed production-style web applications using React, TypeScript, and Next.js dynamic routing architectures.
- Managed version control and CI/CD pipelines using Git, GitHub, and Vercel, maintaining clean commit histories.
- Conducted peer code reviews focused on component maintainability, structural clarity, and codebase scalability.

PROJECTS

Mastery Engine — AI-Powered Structured Learning SaaS (Featured)

mastery-engine-ten.vercel.app | Next.js · TypeScript · Tailwind CSS · Supabase · Groq API · Vercel

Sole designer and engineer — concept, design, development, and production deployment delivered independently.

- Architected a full Next.js 14 App Router application with TypeScript, Tailwind CSS v4, server components, and protected route middleware — shipped to production in under 2 weeks.

- Integrated Supabase for email + Google OAuth, PostgreSQL with Row Level Security, and session management via @supabase/ssr.
- Built Groq LLM API integration (llama-3.3-70b-versatile) with structured JSON generation and streaming chat — powering AI curricula, project challenges, and feedback personalised to each user's skill.
- Designed a 3-phase mastery cycle (Learn 20% / Build 60% / Refine 20%) with a live AI build coach and cycle history persisted in Supabase.
- Resolved a cross-platform mobile Safari touch event bug via production HTML inspection and touchAction event handling.
- Deployed on Vercel with OAuth callback routes, environment configuration, and Supabase edge middleware.

RoleProbe — AI Interview Preparation Platform

Next.js · TypeScript · Tailwind CSS · AI

- Built an AI-powered interview simulation platform with realistic question generation and feedback on communication skills.
- Responsive, accessible UI with smooth transitions built in Next.js and Tailwind CSS.

Movie Discovery Engine — Production Next.js Application

Next.js · TypeScript · TMDb API · Dynamic Routing

- Responsive movie discovery platform with Next.js dynamic routing, async data fetching, error boundaries, and skeleton loading states.
- Client-side preference caching via browser storage to reduce redundant API calls and improve load speed.

EDUCATION

B.Sc. Information and Communication Technology — Northwest University, Kano

2025 | Kano, Nigeria
